Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawing are not formal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Charney et al. (US 4,537,522).

Charney discloses a paint dispensing applicator with safety features comprising:

- a first switch 43 connected in series with the mains supply,
- a second switch 84 operatively associated with the first switch 43 and connected in series therewith, whereby the appliance is only operable when both the switches are operated, and

Art Unit: 2832

- the appliance includes a low voltage transformer 45, a relay 47 connected to the output of the transformer 45 via the second switch and energisable thereby the switchable contacts of the relay 47 being in series with the first switch 43;

- Regarding claim 3, Charney discloses:

- the output of the transformer is a direct current.

Allowable Subject Matter

3. Claims 2 and 4-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the hand held electrical appliance operable from an AC mains supply comprising:

- Claim 2: the first switch and second switch are operatively actuated by trigger mechanisms that are in close proximity to each other and both operable by the single hand of a user.

- Claim 4: the trigger mechanism of the second switch is biased towards an off position.

- Claim 5: the transformer and relay are housed within a plug pack.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
